\$ cat profile

Master's student in Software Engineering focused on **backend development, DevOps, cloud infrastructure, and distributed systems**. Hands-on experience with Java/Spring Boot, microservices, AWS, Docker, Kubernetes, CI/CD, and distributed Java applications. Currently seeking a **PFE internship** in software engineering, backend, DevOps, or infrastructure.

\$ cat education

Master's in Software Engineering <i>Ibn Zohr University – Faculty of Sciences, Agadir</i>	2025 – Present
Excellence Bachelor's Degree – Software Engineering <i>Ibn Zohr University – Faculty of Sciences, Agadir</i>	2024 – 2025
DUT – Computer Engineering <i>Higher School of Technology, Guelmim</i>	2022 – 2024

\$ ls experience/

Freelance Software Developer – Roti d'Or <i>Biougra, Morocco</i>	2025
Developed software solutions for a local business, working across application development, data management, and deployment-related tasks.	
PFE Intern – Vala Bleu <i>Agadir, Morocco</i>	2024
- Developed an Android application for presenting company services, blog content, tools, settings, and customer support. - Worked with Java/Kotlin, PHP, MySQL, XAMPP.	
IT Intern – Commune Urbaine de Biougra <i>Biougra, Morocco</i>	2023
Assisted with employee administrative records and document management using Excel and Word.	

\$ ls projects/

Loyalty Platform <i>Spring Boot • Microservices • Docker • AWS • PostgreSQL • Redis</i>	2026 – Present
- Designing and developing a loyalty platform based on a microservices architecture with Spring Boot for customer points, rewards, QR-code transactions, and account management. - Implementing an API Gateway with Spring Cloud Gateway to centralize service access and request routing. - Containerizing backend services with Docker and running the local platform with Docker Compose, PostgreSQL, and Redis. - Preparing cloud deployment on AWS EC2, including networking, HTTPS, secrets management, logging, health checks, backups, and deployment automation.	
Cloud Resume Challenge <i>AWS • S3 • CloudFront • Route 53 • Lambda • DynamoDB</i>	2026
- Designed and deployed a personal website using a serverless AWS architecture. - Implemented a visitor counter using API Gateway, Lambda, and DynamoDB, with HTTPS through CloudFront and ACM.	
Voting App – Microservices on Kubernetes <i>Docker • Kubernetes • Python • Redis • PostgreSQL</i>	2026
- Deployed a containerized microservices-based voting application on Kubernetes, composed of a voting frontend, result service, background worker, Redis, and PostgreSQL. - Used Redis for temporary vote storage and a Python worker to process votes and persist results in PostgreSQL. - Configured Kubernetes Deployments, Services, Pods, and inter-service communication.	

- Built and managed the application containers with Docker and deployed the complete microservices stack on a local Kubernetes cluster using Minikube.

Distributed CPU Grid – Monte Carlo

2025

Java RMI • Distributed Systems • React

- Developed a distributed master/worker system for executing Monte Carlo simulations using Java RMI.
- Implemented worker registration, heartbeat monitoring, task distribution, result collection, and execution states.

\$ cat skills

Programming	Java, Python, Bash, SQL
Backend	Spring Boot, Spring Cloud, REST APIs, Microservices
AWS Cloud	EC2, S3, Lambda, CloudFront, Route 53, DynamoDB, ACM
Containers	Docker, Docker Compose, Kubernetes, Minikube
CI/CD	Jenkins, GitHub Actions
Infrastructure	Nginx, SSH, DNS, CentOS , Ubuntu
Databases	PostgreSQL, MySQL, Redis
Tools	Git, GitHub

\$ cat languages

Arabic – Native **French** – Intermediate **English** – Intermediate
