~/profile

Master's student in Software Engineering seeking a PFE internship in Backend Development, DevOps, Cloud Computing or Distributed Systems. Interested in understanding how software works beyond application code - from backend systems to containers, deployment, CI/CD, Linux and cloud infrastructure. Hands-on experience through technical projects using Java, Spring Boot, AWS, Docker, Kubernetes and automation.

> PFE INTERESTS

Backend Development
DevOps
Cloud Computing
Distributed Systems
Software Engineering

~/education

Master's in Software Engineering 2025 - Present
Centre d'Excellence - Université Ibn Zohr, Agadir

Licence in Software Engineering 2024 - 2025
Université Ibn Zohr

DUT in Computer Engineering 2022 - 2024
École Supérieure de Technologie, Guelmim

~/skills

Cloud & Infrastructure

AWS Linux Terraform Docker Kubernetes

Containers & Orchestration

Docker Kubernetes Minikube

CI/CD & Automation

Jenkins GitHub Actions Bash

Backend & Development

Java Spring Boot SQL MySQL Python

Systems & Networking

Linux Arch Linux CentOS

Nginx SSH

~/languages

Arabic - Native
French - Professional working proficiency
English - Professional working proficiency

~/projects

Cloud Resume / AWS Portfolio

AWS S3 CloudFront API Gateway Lambda DynamoDB

- Designed and deployed a serverless portfolio architecture on AWS.
- Hosted the static application on Amazon S3 and distributed content through CloudFront.
- Built a serverless visitor counter using API Gateway, Lambda and DynamoDB.
- Automated deployment workflows with GitHub Actions and configured domain and DNS infrastructure.

Distributed CPU Grid

Java Java RMI Distributed Systems

- Developed a distributed computing system using Java RMI.
- Distributed Monte Carlo simulation workloads across multiple computing nodes.
- Implemented communication and coordination between distributed components.

microservices-on-k8s

Docker Kubernetes Redis PostgreSQL Networking

- Microservices voting app deployed with Docker and Kubernetes, using Redis, PostgreSQL, worker services, and Kubernetes networking.

~/experience

Freelance - Web Vitrine 2025

- Built a professional website for a local business using HTML, CSS, JavaScript and Bootstrap.
- Implemented responsive design, SEO optimization and contact forms.
- Deployed the project on a hosting platform and configured a domain.

PFE Internship - Vaia Bleu, Agadir 2024

- Developed an Android mobile application using Flutter to showcase the company's services.
- Worked on application structure, interface implementation, and integration with backend services.

Internship - Commune Urbaine de Biougra 2023

- Completed a technical internship contributing to software and IT-related activities.
